- CATCH CROPS.
A catch-crop is one that is grown between
the periods of other crops, as after early
potatoes and before winter wheat; or
sometimes the word is used to designate
companion-crops, or those that are grown
between the rows of other crops, as
turnips grown between potatoes. The purpose
of the catch crop is to utilize the land to
the utmost, securing an incidental crop.
Bailey, L.H. Cyclopedia of agriculture. v. 2.
